Languages

- Java
- Go
- Python
- SQL
- TypeScript

Frameworks

- Spring Boot
- Spring Security
- React

Tools

- Git
- GitHub Actions
- Maven
- Docker
- Terraform

Databases

- PostgreSQL
- SQL Server

Messaging & Observability

- RabbitMQ
- Redis
- Prometheus / Grafana

🌐 LANGUAGES

Portuguese - native

🌐 **Fluent English - Teaching Cert.**

📅 AVAILABILITY

Remote or on-site

Open to relocation

SUMMARY

Back-end developer with web application experience since 2018, working mainly with Java and Spring Boot. Experience with REST APIs, PostgreSQL, RabbitMQ, Redis, Docker and CI/CD. At CEASA-RJ, I led a team and the supply logistics for Rio de Janeiro's public schools and emergency donations. Fluent English with a teaching certification.

EXPERIENCE

Head of Social Supply Sector - CEASA-RJ

Feb/2024 - Jun/2026

- Led a team in high-demand operations, ensuring continuity of service.
- Coordinated the supply of goods to public schools in Rio de Janeiro and donation logistics during two emergencies: the Rio Grande do Sul floods and the flooding in Rio das Ostras.
- Prepared management reports to support decision-making.

Back-end Developer - Classcont Assessoria Contábil

Nov/2021 - Jan/2024

- Developed web systems end to end, from data modeling and APIs to interfaces, testing and CI.
- Worked with REST APIs, JWT, PostgreSQL, RabbitMQ, Redis, React, TypeScript, Docker and GitHub Actions on administrative and financial systems.

Full Stack Developer - LiftUP Academy

Jul/2018 - Sep/2021

- Developed and maintained websites and internal systems using HTML, CSS and JavaScript.
- Built administrative interfaces and provided technical support for educational management systems.

FEATURED PROJECTS

Tenaz - Java 21 / Spring Boot / PostgreSQL

- Library for durable workflow execution with PostgreSQL persistence, leases, timers and signals. Includes failure testing and deterministic simulation; around 550 workflows/s in a test environment.

CapivaraDB - Go / PostgreSQL protocol

- Relational database written in Go with a hand-built SQL parser, buffer pool, B+trees, WAL, MVCC and cost-based planning. Public MIT project; 99.07% on 109,414 SQLLogicTest cases.

PulseQueue - Java / RabbitMQ / Redis

- Event service with retry, dead-letter queue, deduplication and rate limiting, with Prometheus/Grafana metrics and Testcontainers integration tests.

Social Supply Management - Java / Spring Boot / React

- System created from the needs of the Social Supply sector, covering institutions, donations, inventory and distribution. Java 21, PostgreSQL, Terraform, AWS EC2 and GitHub Actions; includes low-stock alerts and PDF/CSV reports.
